The surplus of wheat in Oregon and Washington will be about the same as last season, but the quality is superior. A party of Pimas Indians went into a Phoenix (A. T.) store recently and purchased ten parlor chairs and two boxes of stove polish.

Threats to kill Graham sympathizers are made at Phonix, A. T., by the friends, it is supposed, of Tewksbury, who is charged with assaulting Graham. An immense glacial field, covering nearly as great an area as that of the Alpa, but not so thick, has been discovered thirty-five miles southwest of Shoup, Idaho.

A young man named Cooper robbed the Superintendent of the Idaho Sam-pling Mill Company at Hailey, Idaho, of \$4,000 in county bonds, and left town with the securities.

A scheme to pool the lumber trade of the Coast from Alaska to Southern Cali-fornia under one head has been origi-nated in San Francisco, says a Tacoma dispatch. The plan of the proposed trust has been sent to the Coast mill owners, and the development of the scheme for the past two months has been carefully kept from the public.

carefully kept from the public.

It is rumored in Salem that hop buyers in the vicinity of Lincoln were offering to contract a prime quality of hops at 35 cents. It is known positively that 25 cents has been offered near Salem for several days, but the 35-cent rumor is an astonisher. Buyers concede that the crop in England will be much shorter than had been expected, and only a small yield was counted on. Shortages are also being reported from California, where picking is already in progress.

where picking is already in progress.

A very large deposit of kaolin has been found in the near vicinity of The Dalles on the Oregon side of the Columbia. This alkaline earth, when heated with pure sand and potash or sods, forms common glass. As sand of the purest quality is abundant in this vicinity, and the constituent alkaline earths are also found in abundance, there is no reason, says The Dalles Times Mountaineer, with the amount of capital lying dormant in The Dalles, that a glass factory should not be inaugurated immediately.

Arrangements are quietly progressing

Arrangements are quietly progressing which are likely to result in carrying out the proposed scheme of building a motor line to Waterloo from Albany. Several capitalists of Portland, as well as Albany, are willing to take stock in the project, and have been looking after the matter during the past few days. It is proposed to run an electric motor line via Lebanon and Sodaville to Waterloo, and from the falls there to transmit power for electric lights and motive power for the street-car system of Albany.

A report comes from Turner and other places in the Willamette Valley to the effect that showers of the queer are working in that neighborhood. In some places they are using the old dodge by changing a two-dollar to a ten by pasting the figure ten from a cigar stamp on a two-dollar bill. And in places they are passing counterfeit silver dollars. The counterfeit dollar is easily detected by the sleek feeling, and is lighter in weight than the genuine half-dollar, but the two-dollar bill is hard to detect, unless one is observing when receiving it.

The gospel of St. Mark, printed on raised letters at Philadelphia in November, 1833, was the stepping stone to the education of the bind. It was printed in the old French type invented by Hany, but now Roman letters (without capitals, to save space) are used, and the Bible is printed in eight volumes, each a little larger than Webster's unabridged dictionary.

The new catalogue of the University of Pennsylvania shows 1,764 students, or twenty less than Yale, while the University of Michigan has 2,638, or just twenty less than Harvard. In the number of teachers Harvard now comes first with 253, the University of Pennsylvania second with 237, Columbia third with 220, Yale fourth with 153 and Michigan

### NATIONAL CAPITAL.

Supervising Architect Edbrooke Says the New Eight-Hour Law Increases Cost of Construction.

The Land Department has notified Representative Hermann that it hopes to be able to allow Oregon \$35,000 for surveys of public lands, and that directions have been sent to the Surveyor-General of Oregon to complete inspection of all surveys not yet inspected. Funds are now provided for that purpose.

Supervising Architect Edbrooke says regarding the new eight-hour law that it will increase the cost of construction 12 per cent. The government spends about \$25,000,000 annually on public buildings, and the additional expenditure under the new law will be \$3,000,000. He says tha law may also make a serious difference in the character of the public buildings to be erected in Washington, Omaha, St. Paul, Milwaukee and San Francisco.

Treasury officials, while apparently unconcerned over the recent gold shipments, are generally observing unusual reticence in the matter. Acting Treasurer Whelpley takes a very philosophical view of the situation, and says be sees no occasion for any excitement because the Assistant Treasurer at New York recently paid out \$1,000,000 in gold for export in exchange for treasury notes. He says that there is nothing unusual in the transaction beyond the fact that gold shipments seem to have continued a little later this year than heretofore. It was due, he thought, to very heavy imports of late, payments for which must be made in gold. Gold exports in his opinion are practically at an end for this season, and the usual reaction in favor of the United States will soon set in.

Representative Hermann was in consultation with the acting Sccretary of War, General Grant, the other day, seeking to expedite department action as to the contracting of work at the Cascade locks and the canal on the Columbia. General Grant assured Mr. Hermann that the department itself is doing all that is possible and allowing no unnecessary time to elapse, and that Major Handbury, being the officer in charge, has been directed to submit specifications upon the contract, which is to be let. So many advantages are taken by contractors in every way that the chief of engineers is determined that when the contract is entered into for this great work, as Congress has directed, it must be understood that no leniency will be shown, and that every particle of work must be completed in the exact time and order specified in the exact time and order specified in the contract, and the contract shall be so carefully prepared that no advantage shall be had by legal quibbles.
